VOLUNTARY ANNOUNCEMENT
“ANLOTINIB HYDROCHLORIDE CAPSULES”
OBTAINED APPROVAL FOR THE FIFTH INDICATION

The board of directors (the “**Board**”) of Sino Biopharmaceutical Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) announces that “Anlotinib Hydrochloride Capsules” (“**Anlotinib**”) (brand name: “**FOCUS V**”), an anti-tumor drug self-developed by the Group, has obtained the drug registration certificate from the National Medical Products Administration of the PRC, for the indication of locally advanced or metastatic radioactive iodine refractory differentiated thyroid cancer (RAIR-DTC) which is inoperable. It is the fifth indication that Anlotinib has obtained approval, following the approval obtained for the treatment of advanced non-small cell lung cancer, soft tissue sarcoma, small cell lung cancer, and medullary thyroid cancer.

With the approval for the indication of RAIR-DTC, Anlotinib has become the first domestic brand name innovative targeted drug that has obtained approval for such indication, which has not only revolutionized the treatment landscape of relapsed/metastatic RAIR-DTC, but also provided a new and powerful medication option for patients in China.

The Group is creating wide-scope deployment for combination therapies of Anlotinib with chemotherapy, PD-1, and PD-L1. Currently, more than 20 clinical trials for Anlotinib have entered Phase II or Phase III. At the 2021 Meeting of American Society of Clinical Oncology (ASCO), the Group released data from 40 studies on the application of Anlotinib to 13 major types of cancers, fully demonstrating the potential for future development of Anlotinib.

By order of the Board
Sino Biopharmaceutical Limited
Tse, Theresa Y Y
